Preface

In the name of almighty Allah who created man and has taught him speech. As it is said that grammar is the key of a language, I think it is certainly right. Because without grammar, learning a language would be full of trouble. Considering the importance and necessity I felt the need to produce something that can help students learn English language easily and more efficiently.

After thinking long, I committed to write the most important and basic aspect of English grammar parts of speech.

This book is the collection of complete parts of speech with their types and definitions, which taken from many famous English grammar books published from foreign universities.

I hope to the students who study this book will find it an easier source of English grammar.

*Sincerely Obaidullah *Jalalzai**

Introduction

Learning about the parts of speeches the first step in grammar. study just as learning the letters of the alphabet is the first step to being able to read and write. From learning the parts of speech we begin to understand the usage of writing a correct sentence and word and how to join the words together to make meaningful communication. To understand what a part of speech is, you must understand the idea of putting similar things together into groups or categories. Let's look at some examples of categories.

Colors	Fruits	Drinks	Languages
blue	banana	milk	Spanish
red	apple	water	Arabic
yellow	orange	soda	Japanese
green	grape	beer	English
black	lemon	coffee	Korean

When you look up a word in a dictionary, you will find not only the meaning of the word but also what part of speech it is. This information is very helpful in understanding the full meaning of the word and knowing how to use it. Some grammar books categorize English parts of speech into 8, 9 or 10 parts of speech. In this book we discuss to 9th parts of speech, we use the traditional categorization of 9 parts of speech

The 9th parts of speech that are used to describe English words are:
