

LANĎA, ZOR WĚLA! WANECĪ

Josef Elfenbein, Hildenborough (Kent)

Introduction

The dialects of Pashto (abbr. Pš), in both Afghanistan and Pakistan, present a complicated and fascinating picture to the student of Modern Iranian, and the relative dearth of material for their study has always been a source of regret. The comparative geographical isolation of many of these dialects makes a personal tour of the areas in which they are spoken indispensable if reliable information is to be gained; and if an attempt is to be made to do anything more than merely to sketch in the barest outlines, a fairly prolonged stay among native speakers is necessary.

Among the many dialects of Pš, Wanecī, which is spoken in Pakistan near the North-West Frontier, occupies a position apart; it is so different from all other Pš dialects that a fair case can be made out for considering it a separate language.

In 1929 G. Morgenstierne made the first reliable investigation of it; the results were published in NTS IV, 156—175. Since then the only further work published consists of the notes made by Morgenstierne, 'Linguistic Mission to the North-west Frontier of India', 14.

It was with the object of collecting new material about Wan (as well as certain other Iranian languages) that I arranged a prolonged stay in Pakistan in 1961, in the former Baluchistan province. Beside the usual physical difficulties always inherent in work of this kind, there are here also the 'political' ones, attendant upon the establishment of the Pakistani authority in the area: the North-West Frontier has never been a happy place for Central governments.

The present study has some claim to completeness, containing as it does the results of my work among native speakers as well as much unpublished material of Professor Morgenstierne, which he has been kind enough to allow me to include. I should like to record here my profound gratitude to him for his generosity in extending to me the use of this material, and for his many helpful comments during the preparation of this article, which have resulted in many essential improvements.

The source of materials is indicated throughout by M(orgenstierne) or E(lfenbein) where it seemed important to do so; this is mainly in the Vocabulary, where unmarked words may be taken to be M, E. This Vocabulary is in two parts. The first part is a general list in which grammatical forms and etymologies, where possible, are suggested. It also contains the words from NTS, IV. The second part is a list prepared by M. It is more specialised in character, and etymologies are not, as a rule, suggested.

Geographical Remarks

The territory in which Wan is spoken (see map) is small in extent, and is now even smaller than it was in 1929 when M first visited it. It is still somewhat isolated: access is solely by road, which runs from Quetta to Ziārat (in the north) or from Sibi to Harnai (in the south). As will be seen, it is roughly 20 miles long and 15 miles broad, oblong in shape and, except for the Harnai district, lies entirely in high mountains.

The territory is split by mountains into a northern and southern part, and communication between the parts is necessarily on foot or donkey-back; the only interior road, from Harnai to Sēmālān, runs in a north-easterly direction. In the north, the main road is that from Quetta to Loralai, which passes through Ziārat (Wan *Wuckī*, Pš *Γwoskī*), the largest village in the district and the nearest bazaar to Wan territory. Wan villages commence about 6 miles east of it, and all lie in the valley followed by the road. The last Wan villages are to be found to the eastwards in the Sanjāwī tahsil, about 20 miles south-west of Loralai.

The southern part of the territory extends roughly along the railway line (the loop-line Sibi-Bostān, now closed), from *Šāhrīg* (Pš *Šāhrāk*) about 40 miles east of Quetta, for about 20 miles up to Spīn Tangī. *Šāhrīg* itself is now Pš-speaking, and at present Wan territory begins about 5 miles east of it, though in 1929 *Šāhrīg* lay in Wan territory.

Wan territory proper, especially in the north, is very wild and beautifully wooded, in great contrast with the bare surrounding areas. The soil is stony, with large numbers of juniper trees making up the large forest which surrounds Ziārat. The average altitude is over 8000 feet, giving summer temperatures which are cool and pleasant, while the winters are severe. The interior is sparsely inhabited, due to its inaccessibility, and only along the Harnai-Sēmālān road are there a few villages.

It is difficult to make any reliable estimate of the number of Wan speakers, but it is very unlikely to exceed a few thousands. They are nearly all shepherds, and most are semi-nomadic. While they belong to a number of different Pš tribes, the majority are Spīn Tarīns. In the north the language is universally called *Tarīnō*, though some informants thought *Waṇecī* a better name, with its reference to the Taṇḍə Waṇī district where they thought the best Wan is spoken. The language is also referred to as *Calgarī* by speakers living in Quetta (who often refer to themselves as *Məxyānī*).

Dialects and Informants

While I do not doubt that dialects exist within Wan, no consistent criteria were found upon which a convincing dialect division could be based. The main differences appear to lie in phonetic variation and in the use of different words; these cannot, however, by themselves form a sufficient basis for e. g. the Northern-Southern dialect division insisted.

upon by many speakers. Where it seemed significant, such Northern forms have been indicated in the Vocabulary.

Principal native sources are as follows:

E: Mullah Sayyid Mohammed, a Nekkāmzai from Čauter, very well informed, and something of an amateur folklorist; Maulana Nūr Mohammed from Ziārat, an itinerant 'doctor'; Sultān Mohammed Pānī, a Pānīzai Pashtun from Quetta, indefatigable in searching out informants and helping to deal with them.

M: Informants not named, but all except one were from the Harnai district. Words marked MS are from an India Office manuscript.

The following notes on phonology and morphology are intended to supplement what has been said in NTS IV, and for brevity sources for each word have been omitted.

Phonology

Wan has been so heavily overlaid with Pš words, forms, and syntax that it is very often quite impossible to ascertain the genuine Wan form; the language, as might be expected, is in a state of some flux.

The Pš present in Wan comes from the South-Eastern 'soft' dialects, with further š, ž < Pš Š, Ž and with s, z (like SE Pš s, z) < Kandahārī standard c, j.*

Wan c, j have a different origin: see below.

The characteristic Wan preference for unpalatalised forms is also shared with some of the neighbouring Pš dialects, in particular Kākarī.

The phonemes of Wan are nearly the same as those of SE Pš, with the following differences:

The short and long e-phonemes, written e and ē (phonetically /ɛ/ and /e/) are kept apart;

The same is true of the o-phonemes, written o and ō (phonetically /ɔ/ and /o/);

The vowels written ī and ū have approximately cardinal values and are not distinguished phonemically from ē and ō respectively.

The sounds written in Pš ž and Ž merge in Wan into a single phoneme ž (/ʒ/). The same is true of the sounds written š and Š in Pš, which merge in Wan to š (/ʃ/).

All the other Pš sounds are present, including the cerebrals; note only that the sound written c is strongly palatalised and aspirated before front vowels to /tʃ/.

The following notes are to be added to NTS IV, 158—162: see the Vocabulary for details.

* *Editorial note.* Owing to technical difficulties, it was not possible to print š and ž with a dot under the line; Š and Ž are printed instead. In the same way, it was not possible to print the accent ' over ī, ū, ē, ō, ā.

| <i>wriš</i> 'awake' | Pš <i>wiš</i> |
- i) Perhaps a shift **xš* > *s* is indicated in *spa* 'night', if genuine; *špa*, also used, is then LW < Pš; *lwes-* 'to milk' < **daoxša-*
- j) Perhaps the most important puzzle upon which Wan throws light is that of the palatalisation in Pš. While in general the rule runs that Pš palatalises when it can (though sporadically in several dialects), the opposite is true of Wan, which tends to avoid palatalisation. In Morgenstierne, 'Ling. Miss. ... India', 11 it was thought that the evidence made necessary a hypothesis of *depalatalisation* in Wan and those

dialects of Pš (e. g. Kākarī) which have unpalatalised forms. Additional evidence now makes another scheme possible; this one, as well as being simpler, has the merit of making the strange sequence *unpalatalised original form > palatalised form > depalatalised form, seem less necessary. We have, then

OIr *ǰ, č > *Pš z, s > $\left\{ \begin{array}{l} \text{Wan } z, s \text{ (also some Pš diall.)} \\ \text{Pš (mostly) } \check{z}, \check{s} \end{array} \right.$

Wan *zāwlə* 'wax', *zawrə* 'leech', *wez-* 'to kill', *zəba* 'tongue', *zia* 'bow-string', *zərgā* 'quickly', *zar-* 'to weep', all have *z* < *ǰ, and the corresponding Pš forms (mostly) show *ž*, though sporadic unpalatalised forms such as e. g. Ghilz. *zəba*, and Ormuri (K.) *zaw^{arī}*, *zāī*, *wazn-* (all LW < Pš) show how involved the picture really is, in Pš at least.

Wan *sunda* 'nose' is probably LW < Hi. *sūnd* while Pš (and Wan LW < Pš) *šūnd* is probably from some Dardic language. Wan *səga* 'sand' (Pš *šəga*, but Ghilz. *səga*) is probably a LW from some Indian language, cf. Skt. *sikatā-*. While Pš has palatalised, for this word many Dard languages have forms in *s-* (cf. EVP s. v. *šəga*); Skt. *śi-* > regularly Hi. *si-*, though this word does not seem to occur in Hi. Note also Orm (K.) *sag^a* (< Pš).

Wan *sungūṇ* 'porcupine' < *sikurna* (Pš *škūṇ* and *skūṇ*) shows a labialisation in Wan, while possibly Pš *š* < *si-*?

aṛwendə 'dyke, bund' is not < *-bandya-*, but, like Pš *wand*, < *banda-*. The *-e-* in Wan is borrowed from the pl. *aṛwendī* (< *-ayah*).

It thus becomes possible to explain the unpalatalised Wan forms as having the same origin as the (palatalised) Pš forms, with old **ya* palatalising in Pš but not in Wan. There follows a list of all the words to be considered in this connexion, the few exceptions having been noted above.

Vocatives usually in *-a*: *laṇḍa* 'O tailless ox! (= Pš). But note also *xūre* 'O sister!'

9. There is also a case, serving as a sort of 'ablative', formed by suffixing *-(e)ya* to N. sing. or N. pl. of any noun. This formation, common in Persian dialects, Bal, and others, is unknown in Pš. The following examples are due to Morgenstierne.

loṭa oboya ḍaka ka! 'fill the jar with water!'
tər aya draxtaya 'up to that tree'
ze ɣreya prewatī 'I fell from the hill'
ze pāneya prewazī 'I fall from the cliff'
loṭaya obə to ka! 'pour water from the jar!'
Harnayīya lež lere da 'it is a short distance from Harnai'
ze xōbēya porta swī 'I rose from sleep'
ze xūbīa wrīš swī 'I woke from sleep'
ze xūbīa čīnastī 'I sat up from sleep'
aya šāya 'from his back'
tər šāya kātə 'he looked behind himself'
ze tāya puštəna kī 'from thee I ask'
špeya 'at night'
ze caṭ waṛī-zūya še yī 'I am better than many boys'
ze gaḍīya pāta swī 'I missed the train'
zɣarda ka! gaḍīya de pāta sʷe! 'Hurry, you will miss the train!'

Sometimes the suffix appears as *-a*:

ze xūne-sara prewatī 'I fell from the roof'
ze pārend dušmana wu-teršī 'yesterday I fled from the enemy'

The following texts represent rather a mixed bag. In the complete lack of a written tradition it is difficult, without a very large number of texts indeed, to make any compelling judgement of literary merit. The purpose of these texts is only to give a notion of the present state of the language: their aim is linguistic, not literary. As will be seen,

the language is in a rather fluid state, abounding as it does in Pashto and Urdu words, grammar, and expressions; I have left them untouched.

A characteristic of the language is a strong stress-accent, noted by me often as a long vowel, and by G. Morgenstierne with an accent mark. All vowels can be reduced to ə when unaccented, and w and y are often reduced to ^u or ⁱ or dropped. Unvoicing of final consonants is also not uncommon. The better to illustrate these things, the texts have not been normalised, and the translations are as literal as possible.

Translations and Notes

I

Once there were¹ three sisters. One night the King went to their house, hid himself, lent an ear, (while) the eldest sister cried out, If my husband will be a butcher, how much meat I shall eat! The middle one said, If my husband will be a baker, how much bread I shall eat! The youngest said, If my husband will be a king, the hair of my offspring will be of gold!

The king heard the whole conversation, and went back home. In the morning he called a baker (and) a butcher. He also called the three sisters. He married the eldest to the butcher. The middle one he married to the baker. The youngest he married himself.

¹ *mā-wata-ya* 'me for of': curious construction.

² *n* in plural is probably due to influence of preceding *r*.

³ The accent marks indicate stress.

Night and day passed, and passed; the king's wife became pregnant. She called the sisters (together); the sisters took counsel among themselves, that if there is a child of this sister, his hair may be of gold. Come: Let us take a puppy for ourselves; if it is true² that the hair of this child will be of gold, we will hide him, and we will show her this puppy, (saying), This was born of you. This plan they adopted, and went to the sister's house. Then the woman laboured, and gave birth to a son. His hair was of gold, and those sisters stood up, and put that child in a box. They emptied it into the river.

When the sister came to consciousness, those sisters stood near her, showed the puppy to her, (saying), This was born of you. They also said to the king that, This puppy was born of you. His very health became ruined.

The sisters stood up again, and went to their own home. The river carried the box to a place where a gardener drew it out. When he opened it, there was a child in the box. The gardener was very happy; he took the child home, said to his wife, I took this box out of the river; when I opened it, this child was lying inside it. His wife was very happy, and said, It is good; I have no children, this is a son to us. She began to take care of him.

Notes: ¹ Lit., 'this was'.

² Lit., 'in truth'.

We set out from Čauter, we were 16 men, well, we went to Manē for work. We were there 3 or 4 nights. Well, on another day we got into a quarrel about Lalī Khān Kākar, so we left our work, we said some very bad words to one another, and then we went away and came to Ziārat. Well, the Mullah Sahib called us, and said, You get out! We poor chaps were helpless, so we came here to this lawn, you sought our talk from us, we gave it; other news from us is good.

When the Wanetsi Dumars were in battle, those Dumars would not accept Harona, so the Dumars went to battle. There were three Wanetsi shepherds, so they went, those Dumars gave insults to Harona, and said, You are no saint! Well, after that Harona became pigeons, they rose up to the sky, over the heads of those Dumars they circled, and then they gave battle to the Dumars because of the three shepherds. Every one of the Dumars was killed, and then the Dumars accepted Harona.

XII

These are no riddles for woman; I am a man!
When my work is done, then I will give much money.

*

XIII

1. Q: It is a cock, it is of marble, it has four legs and one eye.
A: Antimony-box.¹
 2. Q: I have not seen it, you have not seen it; who has seen the fat in the sheepskin?
A: It is the brain in the head.
- Note: ¹ The receptacle for eye-shadow: it has four legs and a hole in the top.

*

XIV

1. Sister, weep! It is the first watch; sister, weep! When the first watch will have passed by, the steed will stand with yellow and green (cloths) upon it.¹
2. This Pakistan celebration, what is it to you? My tryst is a good one; what is (the celebration) to you?
3. Sister! That on your head is white soap — make no mistake about the soap: (away) from companions there is yearning.²
4. There will not always be another (?) happiness; one day without grief, Lover,³ you will not be.
5. There is no faith in the world; yesterday my lover was carefree.
6. This is my mouth; eat it! There is nothin more precious, I know.⁴

Notes: ¹ A *badal*, sung by women when the bride leaves her father's house for that of her husband.

² When proceeding to the washing-place girls put soap and clothes on their heads, and for their last washing before marriage they use white soap. After marriage they are separated from their former companions.

³ Lit., 'wolf'.

⁴ Nos. 5 and 6 are girls' songs.

XV

1. Once there is a fox, he has fallen into a well. But there are no companions, so herself she made companions. 2. So she spoke to a wolf; she said, Come down here! Some sheep intestines are lying, very very fat; you too jump down! 3. The wolf jumped down. So then one companion was made. 4. After that then she spoke to a leopard: Here very good fat intestines have fallen! He also jumped down to them, he also was made a companion. 5. After that she spoke to a hyena; he also became a companion. A jackal also jumped, and was also made a companion. 6. Two days later they got hungry. So she said to the leopard, Uncle leopard! I am I, you are you; this jackal, who the devil¹ is he? 7. He seized, ate the jackal; the fox also ate with him.

8. Another day they got hungry, again she said, I am I, you are you; what is this wolf? 9. He stood up again, and ate the wolf too; the fox also ate with him.

10. Afterwards again the fox said to him: I am I, you are you; this hyena, what is he? He again stood up, and ate him.

11. Night and day passed, passed ... passed ... (she thought of) a few of what she had hidden: those intestines. 12. So she fell to those intestines, she is pulling at those intestines, she is eating the earth. 13. The leopard said to her, What are those? Those are only my own ribs i am pulling, I am pulling at my intestines. 14. He said to her, But are they dead or alive? She said, No. 15. Then the leopard turned aside his face, mouth, into his own stomach, into his own stomach; in his own stomach he pulled out his own intestines. 16. The leopard died on the spot. The fox ate him too,

17. Some time passed; another day some shepherds came, said to the fox: You there, what are you doing? 18. She said, These are posteens; I am preparing them. They said, Will you prepare posteens for us? 19. She said, Yes! I will prepare posteens for you; Throw me a black lamb! She spoke, and a black lamb was thrown down from above.

20. She came, ate that lamb. Another day another lamb was thrown down. She ate it too. 21. Another day the shepherds came, (and asked), Of the posteen how much work is there? She said, I have made the posteen, this one is softening. 22. When it becomes soft, come in the morning; then it will be yours!

23. In the morning the shepherd came, said: That posteen there, is it ready? 24. (She answered), the posteen is ready, you throw your turban to me, from my side downwards raise it up! I will measure the posteen for you.

25. He threw down his turban, and pulled up the fox to his side, on the edge. 26. When the fox was pulled up to the edge, the fox jumped out, left the shepherd on the spot. 27. Up to that time I was with them; the rest God made good.

Note: ¹ Euphemistic translation of *kus*, used often as a mild expletive.

XVI

(Like) the middle branch of the Anjo tree, always
above the gorges you stand;
 Come down to the plain, so that I may see
 Your neck, bearing an ivory ornament.

*

XVII

There is a shaking of Salem; since the Salem plain shook,
 The Tarxi-bush shakes. Adam and Alim are dead,
 On every side Salem plain is ruined,
 On every side Salem plain is ruined.

Vocabularies: Part I

In this list, due mainly to E, words cited without reference to their origin occurred without disagreement in the lists of both M and E. Pš etymologies are taken for the most part from EVP.

Abbreviations:

EVP = G. Morgenstierne, 'An Etymological Vocabulary of Pashto'.

IIFL = G. Morgenstierne, 'Indo-Iranian Frontier Languages' I, II.

NTS = G. Morgenstierne, NTS, IV, 'The Wanetsi Dialect of Pashto'.

PšQ = 'Pashto Qāmūs', Kābul 1954.

gardīdan; if Pš < NP, then necessarily at a very early stage when Pers. was
garḍīdan: cf. also possibly Pš *γarəl*, *γaštāl* 'turn, twist'. If Wan, like other langs
with forms in -*rz-* is borr. from Persian, why *γ-?* Or do Wan, Orm. show a separate
development?

γorži 'milk pail', cf. Pš *γoži* 'water sack', < **γorzya-?* If so, Pš -*ž-* is odd
γəṛə 'calf of leg', Pš *γarai*

zγar, *zγarǰa* 'quick', Pš *zγard*; cf. Part II *zγarda*
zōm, *zūm* 'son-in-law' (= Pš)
zəma 'winter', Pš *zimai*
zmenj (E) 'comb', cf. *wženj*
zān (E) 'body, self', cf. Pš *ǰān* (< NP), diall. *zān*
zəni, *znī* 'chin', Pš *zənai*, *zana*
zūng 'knee', Pš *zangūn*
zunga 'threshing'; Et. unknown
zaipe 'wife', prep. sing. *zaipe*, pl. *zaipe*: < Pers.-Ar. *ǰa'if* 'frail, weak'; Bal. *zayp*,
zayf 'woman'

zārī 'prayer, entreaty' (= Pš)
zīra (E) 'last night', cf. Pš (PšQ) *zerənay* 'left-over from preceding night, stale', and
 IIFL II, 265, Ydgh. *wuzīr* 'yesterday'

zərgā (E) 'quickly'; Pš *zər*, *žir*, < *ǰira-*? Perhaps NP *zīrak*?
zaryūn (E) 'green', also 'colour of a horse' (= Pš)
zarma, *cərma* 'side, near, towards', Pš *carma*, < *čarman* 'skin, leather', Av. *čarəman-*;
 semantics prob. skin > outside > side. EVP (s. v. *carma*) notes Pš *j* < *c* sometimes

zarūr (E) 'needful [of hard work]' < NP *ǰarūr*
zəraž, *žəraž*, fem. *zərža*, *žərža* 'rough', Pš *ziž* < *zǰša-*; Wan *ž* < *z* by assim.; Pš diall.
 also have *žiž*

zar- 'to weep', Pš *žarəl* (< Av. *gar-* 'praise'); < *ǰar-*; cf. also Oss. *zarun*
zarə (n. pl.) 'old', Pš *zor*, fem. *zara*
zow- 'be born', past *wu-zo*, Pš *zowul*
zāwlə, pl. *zāwle* 'wax, resin', Pš *žāwla*; < Skt. *jatu-*
zawre, pl. *zewrī* 'leech', Pš *žawara*; < *ǰarū-* (Bal. *zarāg* < NP)
ziyar, *zyar* 'yellow' (= Pš)
zyātə 'much, more' (= Pš) < NP *zyād*, ultimately; with regard to such forms as Bal. *zyāt*,
 it seems to me that many in Bal. are LW < Afgh. Pers., where final devoicing
 of final *d* is normal, rather than a preservation of old *t*; further support for this
 idea is e.g. Hi. *ziyāt*, hardly < Bal.

žab (E) 'at once'; Et. unknown
žay (E) 'call', Pš *Žay*, < *γaž-* < Av. *garəz-*
žinā (E) 'alive', cf. Pš *žwand-*, *žəwai*; < *ǰiw-*, but Wan *-nā-* is puzzling. Cf. Part II
zwendā

-žina (E) 'behind-' in compounds like *γwažžina* 'behind the ear', cf. Pš *war-čine*
 'outside', etc.?
